# Using data with D3 - Video 3.11

[Bookmark this page](#)

## Video 3.11

Start of transcript. Skip to the end.

We've been looking at D3, which allows us to generate HTML and SVG elements based on data.

In this lesson we'll start looking at how we can use bigger sets of data and how we can access data that's elsewhere on the world wide web.

This lesson will focus on this example where I'm creating a chart that shows housing prices versus the size of the homes.

On this axis, the y-axis, we have the size of the
