Using APIs with React - Video 3.6

🔖 Bookmark this page

Video 3.6

Start of transcript. Skip to the end.

At the start of the course I showed a diagram of the worldwide web,

which we can think of it as a directed graph where the nodes

are the documents that are available on the web.

How can we take advantage of the structure of the web of all those documents

as we're putting together our own web applications, and

how can we do that using a framework such as React?

So, how was web development done in the old days, let's say

0:04 / 14:36   ▶ Speed 1.0x   🔊   HD   ⛶   CC   ❝

Notes:

- The HTML for the ArticlesGrid example is available here. Note that you will need to get an API key at https://developer.nytimes.com/ and set the API_KEY variable in the componentDidMount function in order for the code to work.
